

# Union Council Motion - M.1920 - 26

## Title of motion:

Ecosia Search Engine

## What do you want to change?

Ecosia is a search engine that uses the ad revenue it generates from searches to fund operations around the world planting trees. On average every 45 searches with Ecosia plants one more tree. I would like the University to change their default search engine to Ecosia.

## Why do you want to change it?

The University have made a pledge to be Carbon Neutral by 2027, changing to Ecosia can help plant up to 40 new trees per day which will contribute to this goal.

## What do you want Hull University Union to do?

To lobby the University to make sure they make this change.

**Proposer:** Ryan Ward, Student Trustee

**Secunder:** Isobel Hall, President of the Union
